About Coulibri Ridge

Coulibri Ridge is entirely off-grid, solar and wind powered. Drinking water is refreshing, purified rain water captured by the roofs and stored in vast underground cisterns. Every aspect of Coulibri Ridge, from its construction to its operation, has been designed from inception to minimize the project's impact on the natural environment and to showcase how a small, comfortable, off-grid resort can be a model for local, sustainable tourism development. To further contribute to the sustainability goals of Dominica, we founded two active, not for profit organizations: REZDM (www.rzdm.org) and the Humane Society of Dominica (www.hsdominica.org).

Please don't hesitate if you have any question. We would be delighted to give you more information and be of assistance in designing a stay that will meet all of your expectations.
